

Sustainabilitylive! is the home of five leading environmental exhibitions, including BEX, ET, IWEX, NEMEX and SB - The Event. These exhibitions include hundreds of exhibitors, insightful seminars and conferences, interactive feature areas and lots more.

Sustainabilitylive! 2011 attracted a total of 9003 attendees, with all major industry names represented. The packed seminar theaters and busy exhibition floor shows the strength of the water, energy, environment and sustainable business sectors and the emphasis that more and more companies are placing on sustainability.

To get a taste of this year's show see the show video below or view the post show press release by clicking here.

One happy exhibitor said:

"Sustainabilitylive! proved to be a very fortuitous event for Automated Water & Effluent Ltd (Awe). Our range of dosing pumps received a positive reception and we were impressed with the number of visitors and relevance of visitors to our stand.

The impressive marketing and promotional effort around Sustainabilitylive! in 2011 ensured that our existing customers and suppliers could easily find us. In addition prospective customers and suppliers could also be greeted and we saw a very positive response to our range of pH Controllers.

Considering the increase in footfall and the relevance of attendees we will certainly be considering attending Sustainabilitylive! in 2012."

Tom Young, Automated Water & Limited
