

The instrumentation specialists Ashtead Technology and TSI will co-host a technical workshop on Dust and Air Quality Monitoring. The free-to-attend event will take place on Wednesday 27th January 2016 at TSI's UK headquarters in High Wycombe.

Ashtead's Josh Thomas says: "This is a training event, designed to provide anyone with a professional interest in air quality with an opportunity to learn about the latest monitoring technologies and to discuss their applications with industry experts."

Starting at 9.45am and finishing at around 3pm, the day will be split into 4 sessions: Workplace Dust Monitoring; Environmental Dust Monitoring; a case study on the monitoring of particulate exposure by school children, and a Practical Workshop in which attendees will have the opportunity to operate some of the latest instruments.

Lunch and refreshments will be provided, but places are limited and will be allocated on a first-come, first-served basis. To register for this event, simply visit www.ashtead-technology.com/TSI or call 0845 270 2707.
