

Ecobuild is the UK's largest and number one event for specifiers across the built environment. No other UK event attracts 33,319 high calibre, senior level decision makers and influencers from architects and developers to local government and major infrastructure clients.

In 2017, the event will return on 07-09 March, with a renewed focus on enabling sustainable construction for 2017 and beyond. With Lead Partner the UK-GBC, Ecobuild 2017 will explore sustainability as a driver to innovation and growth, a catalyst for regeneration and as a way for organisations to do better business.

This year the event theme is Regeneration. Ecobuild 2017 will be regenerated into an immersive city - complete with main street, distinct destinations and special feature attractions. Central to the experience will be Regeneration Drive, a boulevard running through the middle of Ecobuild, linking different aspects of the exhibition and enabling you to experience the very best examples of innovation and creativity from across the built environment.

In the lead up to the event, Ecobuild will be driving industry-wide conversation around the ongoing evolution of sustainability. Industry professionals can get involved in the conversation on social media using #SustainabilityIs
