

The scheme is currently catering for companies with high energy demands throughout various industry sectors along with a growing interest in the Agricultural sector.

With the support of RIOS, companies can develop their vacant roof space into solar power hubs, consuming all energy generated from the system and reducing their reliance on the national grid. Inclusive of this package, the company will partner with SAS to ensure maximum efficiency and output throughout the lifetime of the system.

With a proposed idea that all companies across the UK should be producing their own energy by ‘natural default’, we are working hand-in-hand to help both the Government and UK businesses to reduce dependence on fossil fuels in order to meet the UK’s 2020 targets.
