

ALS Environmental are pleased to announce that as from Monday 3rd November 2014 they are reducing their standard turnaround time for the analysis of Waste Acceptance Criteria (WAC) samples to 7 working days. This is a 30% reduction in their standard turnaround time and follows extensive work from their operations teams.

The analysis of samples for WAC is used to determine the appropriate disposal method of a waste material. There are 4 standard suites for the BS:EN 12457 analysis:

- Inert WAC
- Non-Hazardous WAC
- Hazardous WAC
- Combined WAC

To launch the reduced standard turnaround time, for a limited time only ALS Environmental have released some discounted rates for the WAC analysis, with prices starting from £74 for a two-stage Non-Hazardous WAC.

Lisa Clarke, Operations Director at ALS Environmental described the impact of the reduced turnaround time on WAC analysis:

Providing analytical data in an efficient and timely manner has always been our goal. The developments undertaken by our analytical teams to reduce the WAC turnaround times by 30% is a prime example of the hard work and dedication of our laboratory staff. The reduced turnaround and prices are a statement to the market that ALS Environmental are key service providers in the Waste Management market.

In order to take advantage of this limited time offer clients are advised to contact our customer service team on 02476 42 12 13 and request an updated quotation.

Capacity is restricted for this unique service and all customers are requested to pre-book the 7day WAC at the promotional price to guarantee the service delivery and price.

If you have any questions on the companies improved WAC service, visit their website www.alsenvironmental.co.uk
